# DUSANAPUDI SUMANTH

## AI Engineer | Generative AI | Agentic AI | RAG

Andhra Pradesh, India | dusanapudisumanth@gmail.com

LinkedIn: linkedin.com/in/dusanapudi-sumanth-2925b3439 | GitHub: github.com/Sumanthduasanapudi

Portfolio: sumanth-ai-system-profile.vercel.app

## PROFESSIONAL SUMMARY

Computer Science and Engineering graduate (2026) with six months of internship experience as an AI Engineer Intern at ReveloSoft, contributing to two AI products: Tom & Jerry, a pair of candidate- and employer-side hiring agents, and CreditDoctor, an AI credit-health assistant. Hands-on with the OpenAI API, structured outputs, Azure AI Document Intelligence, prompt and context engineering, PII guardrails, and testing for relevance, consistency, and hallucinations. Built RAG, multi-agent, and LLM applications using Python, FastAPI, LangChain, LangGraph, CrewAI, and MCP.

## TECHNICAL SKILLS

**Programming & Web:** Python, SQL, React, Node.js, Express.js, REST APIs

**Generative AI & LLMs:** OpenAI API, Claude API, Llama 3.2 (Ollama), prompt engineering, context engineering, structured outputs, JSON validation

**RAG & Retrieval:** LangChain, embeddings, SentenceTransformers, ChromaDB, chunking, semantic search, source attribution

**Agentic AI:** LangGraph, CrewAI, Model Context Protocol (MCP), multi-agent workflows, conditional routing, tool integration

**Backend & Safety:** FastAPI, Pydantic, Azure AI Document Intelligence, resume parsing, relevance/consistency/hallucination testing, rubric-based scoring, PII guardrails, LangSmith tracing

**Tools:** Git, GitHub, Postman, LangSmith

## INTERNSHIP EXPERIENCE

**AI Engineer Intern | ReveloSoft** May 2026 - October 2026

**Tom & Jerry - AI Career and Hiring Agents | tomandjerry.ai**

AI hiring product with two agents: Tom coaches job seekers; Jerry helps companies define roles and screen candidates. **Tech:** OpenAI API, structured outputs, Azure AI Document Intelligence, Python.

- Built conversational flows for Tom that capture education, skills, projects, and goals in structured candidate profiles.
- Generated ATS-friendly CVs using OpenAI structured outputs and prompt templates; parsed uploaded resumes with Azure AI Document Intelligence.
- Implemented role-specific mock interviews with adaptive follow-ups and rubric-based feedback.
- Contributed to the Kanban job tracker and job-application workflow for saved, applied, and interview stages.
- Developed Jerry workflows to gather role requirements and conduct first-round screening, producing structured candidate summaries.
- Applied context engineering to candidate profiles, job descriptions, and conversation history; tested for relevance, consistency, and hallucinations.

## INTERNSHIP EXPERIENCE - CONTINUED

**CreditDoctor - AI Credit-Health Platform | creditdoctor.in**

Platform for users in India to analyse their own credit bureau reports and get guidance on improving their credit score. **Tech:** LLM APIs, prompt templates, JSON output validation, PII guardrails.

- Developed an AI assistant that analyses uploaded credit reports and guides users to identify and fix errors.
- Designed prompt templates with JSON validation to extract accounts, enquiries, and discrepancies.
- Added PII guardrails to protect personal and financial data in credit reports.
- Tested assistant responses across functional, boundary, and hallucination scenarios.

## AI PROJECTS

**AgentForge AI - Multi-Agent RAG & MCP Platform**

Developed a Python, FastAPI, and React platform for document question answering and multi-agent workflows. Used LangGraph to route requests to document retrieval or MCP tools and coordinated CrewAI research, analysis, and review agents.

**InterviewForge AI - Local RAG Interview Coach**

Built document Q&A, mock interview, and Python study modes. Implemented PDF ingestion, chunking, embeddings, persistent ChromaDB storage, top-3 retrieval, and grounded Llama 3.2 answers via Ollama. Added adaptive 5-question practice with 0-10 scores, feedback, and hints.

**NewsPulse - AI News Briefing Agent**

Built an app that deduplicates RSS articles, groups related headlines by meaning, and generates source-attributed briefings with LangChain and Claude. Implemented controlled concurrent API calls, Pydantic validation, and optional LangSmith tracing.

**AI Meeting Minutes Generator**

Integrated Claude with FastAPI and Express.js to convert TXT, VTT, and JSON transcripts into concise meeting notes.

## ACADEMIC PROJECTS

- Plant Disease Detection using Machine Learning: analysed plant leaf images with image processing and machine learning to predict disease and support preventive action.
- Gesture-Controlled Mouse Using AI-Powered Video Analytics: built a virtual mouse that uses computer vision and machine learning to control cursor actions through hand gestures.

## EDUCATION & CERTIFICATIONS

**B.Tech, Computer Science and Engineering** | Vel Tech | 2026 | GPA: 7.0/10

**Diploma, Mechanical Engineering** | S.M.V.M. Polytechnic, Tanuku | 2023 | 67%

**Certifications:** Model Context Protocol (MCP) - Anthropic; LangChain and LangGraph - LangChain Academy; Generative AI - Databricks.
